CERTIFICATIONS

Gesture Control Wheel Chair

Smart Bihar Hackathon 2024
Role – Team Leader

- Led the design and implementation of a gesture-controlled wheelchair.
- Promoted effective communication and teamwork for better project outcomes.
- Achieved an innovative prototype product that improved mobility for users.

ABOUT ME

A proactive civil engineering diploma student, with a focus on site management and project coordination, eager to translate academic knowledge into practical solutions. I aim to ensure efficient project execution by integrating my technical abilities, thorough attention to detail, and commitment to upholding safety and quality standards.

INTERNSHIP

Civil Engineer Intern

(Sep'24 – Oct'24)

Bihar Rajya Pul Nirman Nigam, Patna |

- Contributed to the construction of **2 Lane Double-Decker Flyover on Ashok Raj Path**, working on the pier cap, portal frame, portal cap, and drainage system.
- Acquired practical experience in site engineering tasks such as overseeing structural work, managing materials, and enforcing safety measures.
- Worked closely with multidisciplinary teams on a significant infrastructure project.

PROJECTS

Campus Development

College Major Project
Role – Team Leader

- Led the creation of a scaled-down model of the college campus, focusing on layout and architectural details.
- Conducted comprehensive research on campus infrastructure, including building plans, elevations, and spatial arrangements.
- Gained practical experience in analysing architectural blueprints and translating them into scaled models.
- Collaborated closely with team members to integrate functional and aesthetic elements into the miniature design.
- Our team had the privilege of presenting a visionary campus development project to the Honourable Chief Minister, aimed at enhancing academic and infrastructural excellence.

Prefabricated Structure

College Minor Project
Role – Team Leader

- Led the project and effectively managed the team during the construction of a prefabricated structure model.
- Collaborated with the team on the design and development of the model, utilizing each member's strengths.
- Produced initial sketches and layouts using AutoCAD to visualize the structure and guide construction efforts.
- Delivered a presentation to classmates and professors on the benefits of prefabricated construction.
